FOREIGN LANGUAGE IN THE PROFESSIONAL ACTIVITY OF A FUTURE SPECIALIST

«

»

We live in the age of development of modern information technologies. We use technology in everyday life. When we rest, work and study.

English language proficiency is increasingly important in the workplace and can have a determinative effect on the job opportunities and professional growth of today’s workers.

Why Learning English language is important?

- **Perfect communication** – It is important to speak effectively. People get impressed by those who have good communication skills.
- **Gain Confidence** – If you own good communication skills then your confidence will automatically be high.
- **Achieve your goal early** – Effective English language skills help you meet your career goals quickly.

- **Effective personality** – When we speak effectively and with confidence, anyone can get attracted.
- **Part of the Global community** – English language is a part of the global world. So, if one knows good English then one can interact with others.
- **Multiple Career Prospects** – A person possessing effective communication skills have more career opportunities than others[3].

The tech field is ripe with peculiar terms which can be extremely baffling, to the untrained eye.

Programming is based on English. While researching on this topic, i have also perused numerous developer's forums for the experts' perspective. It uncovered a wealth of opinions by programmers on why they think English prevails in coding[1].

Throughout the history of computer science, English has emerged as the basics of programming languages, despite the fact that some were written by non-native English speakers for example PASCAL in Switzerland, PHP in Denmark, Ruby in Japan, and Python in The Netherlands.

Programming languages were created to describe the computations performed by computers. Each language defines its own format (syntax) declaring how code should be structured, and the meaning (semantics) of the language elements.

A programming language's features include orthogonality or simplicity, available control structures, data types and data structures, syntax design, support for abstraction, expressiveness, type equivalence, and strong versus weak type checking, exception handling, and restricted aliasing.

The development of programming languages has been influenced by the development of hardware, the development of compiler technology, and the user's need for writing high-performance programs in terms of reliability, readability, writeability, reusability, and efficiency. The hardware and compiler limitations

Have forced early programming languages to be close to the machine language. Machine languages are the native languages of computers and the first generation of programming languages used by humans to communicate with the computer[2].

If you work at a multinational corporation, a foreign corporation, or a company that liaises with English-speaking stakeholders, then English corporate language is an imperative skill to attain beyond whatever programming languages you specialize in. Not only will it make it easier to communicate with coworkers, supervisors, and end users, but it will also open doors for many other opportunities or advancements in your career later!

There are three main aspects to preparing for a job interview in English. First, there's the standard preparation you would do for an inter-

view in any language. This includes things like reading up on the company and planning out how you'll present yourself, your education, and your work experience. You can get a lot of good advice in preparing for any interview by searching for things like "prepare for a job interview". Read several articles and apply their advice in your preparations.

The second aspect of preparing for a job interview in English is reading up on common interview questions in English and thinking through your answers in advance. Here are some of the most common job interview questions in English:

- How would you describe yourself?
- What are your strengths?
- What are your weaknesses?

Thanks to the foreign language knowledge students have the opportunity to broaden their horizons and to develop personal qualities and professional skills that solves one of the goals of education – one of harmoniously and fully developed personality.

A good knowledge of English allows you to communicate effectively with international clients, helping them to trust you and your organisation resulting in strong and lasting business relationships. People who use English for their work on a daily basis need to be able to use English for a variety of purposes including in meetings and negotiations, for managing, writing reports, giving presentations and in social situations.

English is considered to be the language of the future. Students are sure that English is an essential requirement in getting highly-paid job, which enable them to read instruction materials, industrial imported goods, equipment, machines more further to communicate with foreign colleagues due to their daily work requirement. It is very important to investigate students' motivation and attitude towards learning English. That's why it is necessary to create a good learning atmosphere. New methods can guide the students to learn more, meaningful and successful.
